

MX-290

Two ways for opening:
Fingerprint / mechanical key
Material: SUS304
Optional finishing: SPVD, CR
Workable mortise: various type of mechanical mortise
Dimensions: lock panels 37*290*30mm, handle 139mm

MDT-3360

Four ways for opening:
Fingerprint / Password / RFID card / mechanical key
Material: SUS304
Optional finishing: CR, SPVD, AB, AC
Workable mortise: 6068 mortise
Dimensions: lock panels 75*338*30mm, handle 145mm

MDT-3550

Four ways for opening:
Fingerprint / Password / RFID card / mechanical key
Material: SUS304
Optional finishing: CR, SPVD, AB, AC
Workable mortise: 6068 mortise
Dimensions: lock panels 76*355*33mm, handle 148mm

MDT-1380

Four ways for opening:
Fingerprint / Password / RFID card / mechanical key
Material: Zinc Alloy
Optional finishing: CFG
Workable mortise: 6068 mortise
With door bell function.
Dimensions: lock panels 75*336*25mm, handle 142mm

TDT-1330

Three ways for opening: Password / RFID card / mechanical key
Material: Zinc Alloy
Optional finishing: RG, CR
Workable mortise: M001, M003
With door bell function.
Dimensions: lock panels 70*315*24.5mm, handle 142mm

MDT-7180

Four ways for opening:
Fingerprint / Password / RFID card / mechanical key
Material: SUS304
Optional finishing: SPVD, CR
Workable mortise: 6068 mortise
Dimensions: lock panels 85*718mm

MDT-3380

Four ways for opening:
Fingerprint / Password / RFID card / mechanical key
Material: SUS304
Optional finishing: CR, SPVD, AB, AC
Workable mortise: 6068 mortise
Dimensions: lock panels 75*338*30mm, handle 145mm

MDT-3810

Four ways for opening:
Fingerprint / Password / RFID card / mechanical key
Material: SUS304
Optional finishing: CR, SPVD, AB, AC
Workable mortise: 6068 mortise
Dimensions: lock panels 76*380*33mm, handle 148mm

TDT-1380

Three ways for opening: Password / RFID card / mechanical key
Material: Zinc Alloy
Optional finishing: CFG
Workable mortise: 6068 mortise
With door bell function.
Dimensions: lock panels 75*336*24mm, handle 142mm

TDT-3360

Three ways for opening: Password / RFID card / mechanical key
Material: SUS304
Optional finishing: SS, SPVD, AB, AC
Workable mortise: 6068 mortise
Dimensions: lock panels 75*338*30mm, handle 145mm

Standard mortise:
SS 6068 mortise

Optional mortise:
SS 6068 mortise with
heaven and earth bolt

- *Detect fingerprint automatically when put fingers onto sensor.
- * With OLED screen to display English menus, follow the menu to operate the lock step by step easily.
- * Large capacity: 200 fingerprints, 99pcs cards, 2 passwords, and can be extended.
- * Maximal 30 digits can be input for protecting the correct password unexposed.
- * Can set Passage Mode (normal opening state) for special cases.
- * With self-protection mode if input wrong password 3 times continuously.
- * Can store the latest 1000pcs unlocking records and read them in OLED screen.
- * Lift handle upwards from outside door to pull out deadbolts for double lock when leaving.
- * Use 4pcs 1.5V AAA alkaline batteries, saving energy, with low voltage alarm.
- * With USB port for emergency power supply when battery is used out.
- * Suitable for Luxury villa, office and apartment.

LEVEL

How it works

- 1.The hotel guest downloads the app, do the registration on the app by their own email address through internet or mobile network.
- 2.The guest makes a reservation and then hotel administrator will send out the Bluetooth key according to guest's registration information(email address and user name).
- 3.The guest receives a Bluetooth key from app through internet or mobile network.
- 4.On arrival the guest can open their rooms in valid time by cellphone while bypassing the front desk.
- 5.With enabled Bluetooth function on the cellphone, the guest can press the button in the app, wait for the blue light of door lock, turn the lock handle and enters the room.

LEVEL Bluetooth Hotel Lock

Nowadays smartphone has become to a necessary and indispensable tool that never walk away from our lives, especially for the young generation. Use smartphone to pay the bill in online stores, supermarkets, restaurants, hotels, and for shared bicycles or cars etc has become a trend, which brings users a faster and much more convenient experience.

Therefore LEVEL Bluetooth Hotel Lock solution is emerged to adapt this trend. Through bluetooth low power-consumption technology, Level Bluetooth Hotel Lock accepts mobile phone as its access card, no need to wait for card programming on reception desk any more. Thus from room reservation, pay for hotel, check in to check out, all process could be finished on one mobile phone.

LIS2008-RF-290

Material: SUS 304
Optional finishing: SPVD, CR
Workable mortise: various types of mechanical mortise

LIS2008-RF-1360

Material: Zinc Alloy
Optional finishing: SGB
Workable mortise: M001, M003

LIS2008-RF-1108

Material: SUS304
Optional finishing: SS
Workable mortise: M001, M003

LIS2008-RF-LEL02

Material: SUS 304
Optional finishing: SS
Workable mortise: 60/70 tubular latch

LIS2008-RF-1330

Material: Zinc Alloy
Optional finishing: RG, CR
Workable mortise: M001, M003

LIS2008-RF-1660

Material: Zinc Alloy
Optional finishing: CR, SPVD
Workable mortise: M001, M003

LIS2008-RF-N300

Material: Zinc Alloy
Optional finishing: CCR, PVD
Workable mortise: M001P, M003P

LIS2008-RF-1550

Material: Zinc Alloy
Optional finishing: CR, SPVD
Workable mortise: M001, M003

Advantages of Level hotel lock system

- *Could check opening records of some management cards, not only lock's records.
- *Translate the software to use your local language.
- *Breakfast ticket can be programmed into guest card
- *Advanced backup system: special functional card to issue temporary guest card to avoid the inconvenience caused to customers and the chaos for management.
- *Low power waste, the static current can be ignored. The lock can be used for more than 1 year normally with 4pcs AA Alkaline (LR6) batteries.
- *One card solution, the same card for lock, car parking, elevator, building entrance, time attendance, consumption system, staff management system etc.
- *Alarm function: alarm works for improperly door closing, low battery voltage, or someone pastes the latches purposely.
- *Can be set as a Passage Lock (normal opening state), especially for conference.
- *Can store the latest 1000pcs unlocking records (including mechanical key and inside open).
- *Equipped with mechanical key for double security.
- *With Public Door and Area Card function. One guest card could open maximal 7 rooms.
- *Single version or network version software for your choice, easy and convenient to install and use, could interface with very famous PMS, including Fidelio, Opera.

Hotel Lock System Accessories

PNP Encoder

3 in 1 Hand terminal

Dongle

Card

DAQ SET

Software

PNP Encoder: Made of ABS insulating material, Level PNP Encoder is used to read and write cards with characteristics of fast speed, plug and play. Works in Windows XP / Vista / Win7 32/64 bit / Win8 / Win10 OS.

3 in 1 Hand terminal: One device with 3 functions of issuing Clock card, Installation card, and downloading unlocking records without a connection with computer, providing clients with most convenient and high efficiency solution.

Dongle: A key to lock software, and double security for your management.

Card: MF1 card, can be issued to different types of cards with different functions to open the lock, can be reported lost, recycled and reused.

DAQ SET: Information card

It is used to retrieve all information of PCB, including detailed parameter settings of lock, card type code, blacklist of card ID, status of lock etc, which plays a very important role in some special situation. For example, certain rooms have things stolen.

Record card

It is used to retrieve unlocking records from PCB, including the one by mechanical key and inner handle.

Software: Works in Windows Xp / Vista / Win 7 / Win 8 / Win10 OS.

Hotel Lock Mortise

M001P
(70mm mortise)
standard: zinc alloy latches
optional: stainless steel latches

M001
(70mm mortise)
standard: zinc alloy latches
optional: stainless steel latches

M003
(60mm mortise)
standard: stainless steel latches
